EDUCATION

Purdue University

Bachelor of Science in Computer Science

- **Certification:** Entrepreneurship and Innovation, Application in Data Science

West Lafayette, IN

August 2023 – May 2027

EXPERIENCE

Undergraduate Data Scientist

August 2025 – Present

Prediction Guard, Data Mine Corporate Partners

West Lafayette, IN

- Leading bi-weekly sprint planning for a secure RAG AI Agent designed for enterprise data privacy; utilizing Kanban and Cursor/Claude to rapidly iterate on code and resolve 10+ critical security vulnerabilities identified during red-team testing.
- Driving faster client adoption by creating standardized mitigation guides for prompt injection, enabling the sales team to replicably address security concerns across multiple enterprise accounts.

Undergraduate Researcher

April 2025 – August 2025

Kihara Bioinformatics Laboratory

West Lafayette, IN

- Developed an interactive Tableau dashboard to visualize high-dimensional genomic data, enabling non-technical and technical stakeholders to seamlessly explore and interpret research findings.
- Optimized PyTorch models by monitoring F1-Score and Precision-Recall curves, identifying key data imbalances and achieving 85% accuracy across 10,000+ protein samples.

Undergraduate Data Scientist

August 2024 – May 2025

AgReliant Genetics, Data Mine Corporate Partners

West Lafayette, IN

- Enabled targeted marketing strategies by implementing a BIRCH clustering algorithm to identify high-value customer segments, resulting in a predicted 15% increase in lead conversion.
- Engineered an automated data pipeline in Python and SQL to consolidate multiple data sources, reducing preprocessing runtime by 60% and accelerating model delivery.

PROJECT LEADERSHIP

Spryn - Health Tech App | *Agile, Jira, Product Roadmapping, API Integration*

March 2025 – Present

- Established Agile workflows for a cross-functional team of 20, utilizing Jira to track sprint velocity, manage dependencies, and ensure 100% data integrity across project boards.
- Defined the Product Roadmap and MVP scope based on market gap analysis, integrating Terra/Sahha APIs to deliver actionable biometric insights while balancing technical constraints with user experience goals.

Snap Study | *[Video Demo]*

May 2025 – June 2025

- Identified critical accessibility gaps for neurodiverse students through field interviews and market research, leading a team of 5 through the full product lifecycle—from Figma wireframes to a deployed user-centric AI-powered learning tool.
- Optimized the end-to-end AI pipeline using Cursor and Gemini, increasing text simplification accuracy by 35% to better serve the identified accessibility needs.

CASO Feedback Analysis Tool | *Python, Pandas, NLP, Advanced Excel*

September 2024

- Streamlined consumer sentiment analysis by building a custom NLP tool, leveraging Microsoft Copilot for accelerated development, to process 3,000+ survey responses.
- Saved the operations team 40+ hours per cycle and provided the data-driven insights that directly resulted in a 25% year-over-year increase in attendee satisfaction.

TECHNICAL SKILLS

Product and Strategy: Product Roadmapping, Agile/Scrum, Kanban, Jira, Market Research, Figma, User Stories, Risk Management, Microsoft Office Suite

Data and Analytics: SQL, Power BI, Tableau, Python, Excel, Google Analytics, A/B Testing, Snowflake, Customer Segmentation, Data Cleaning

Development/AI: Python, C++, Java, REST APIs, AI-Assisted Development (Cursor/Copilot/Claude/Gemini), Generative AI (LLMs, RAG), Prompt Engineering, Agentic AI
